TASDEER

Qatar Development Bank exporting arm, Tasdeer, offers export financial packages and provides a platform for Qatari exporters and global importers to interface, engage and foster business communities aimed at improving future growth prospects.

Launched in 2011, Tasdeer provides access to finance, credit insurance and advisory services for exporters and supports businesses to develop their export capabilities through identifying thrust products and target markets, providing trade information and foreign market intelligence across various geographic borders and conducting market entry studies for the target markets.

Moreover, Tasdeer supports Qatari exporters to participate in global trade exhibitions and identify potential importers.

All Qatari exporters, regardless of the size of their export contracts, sector or turnover are eligible for Tasdeer support.

For more information and enquiries you can contact us through:
Tel: +974 4430 0296, Fax: +974 4430 0053

ECONOMIC EVOLUTION AND UNRIVALED OPPORTUNITY

Qatar, officially known as the State of Qatar, is an oil-rich Middle East peninsula, located on the Arab Gulf west coast.

Fuelled by progressive Government strategies driving free trade and foreign investment, Qatar's economy has been transformed into one of the most buoyant in the region. Liberal taxation, relaxed barriers to investment and wide-ranging development programs provide a marketplace bursting with opportunity. With the world's highest GDP per capita, the world's third largest proven gas reserves, and foreign business queuing up to be part of Qatar's future – including the Qatar World Cup 2022 – the country is enjoying burgeoning prosperity and delivering excellent returns on investment.

The benefits of doing business in Qatar are many, like easy access to locally produced raw materials, easy availability of skilled and inexpensive manpower, extremely low energy costs and 100% repatriation of profits and capital after income tax.

In short Qatar is open for business and ripe for enterprise.

QATAR

HOME TO DIVERSE INDUSTRIES

Qatar is home to several industries that catalyze change and revolutionize the world. Industries like plastics, chemicals, aluminium and steel, food and fiberglass supply raw material for diverse products that form a main part of Qatar's exports thereby augmenting the nation's economic growth and development.

The majority of the companies in these industries have been certified by ISO 9001 and other international bodies inspiring the end users with confidence in the superior quality of their products and services. They contribute to a clean and green environment by using cutting edge degradable and biodegradable technology.

Building on their existing customer base in Qatar these companies are looking to expand their business interests worldwide.

AN INSIGHT

Qatar Development Bank was established in 1997 to reflect the farsighted vision of H.H. Sheikh Hamad Bin Khalifa Al-Thani, towards diversifying Qatar's economy through supporting the private sector.

QDB is 100% owned by the Government of the State of Qatar, with the main objective to contribute to the development and diversification of the economic and industrial investments of the country, for which QDB has aligned its strategy to Qatar National Vision 2030 to promote and facilitate the development and growth of the private sector in core economic sectors that will result in long-term socio-economic benefits to the people of Qatar.

Over the years, QDB has significantly contributed towards carving a dynamic and productive private sector in Qatar.

From providing financing solutions and value-added services to private sector companies, to developing exports and promoting access to new markets for Qatari Enterprises, the Bank has been a powerful catalyst for Qatar's socio-economic development.

Today, QDB continues to play a vital role in the development of many leading projects in Qatar, with a focus on not only providing financial assistance, but also advisory support and guidance to SME's on how to start up, grow and expand their activities, with an overall aim to developing a diversified and sustainable economy.

Company Profile

Qatar Integrated Plastic Bags Factory (QIPBF) is a manufacturer and quality packaging solutions provider based in Doha, Qatar.

Established in December 2013, QIPBF produces various types of PP woven sacks from its large newly constructed manufacturing plant situated in the New Industrial Area, Doha. QIPBF is 100% owned by Injazat Holding Company (W.L.L), a subsidiary of State Holding Group.

The facility includes a large capacity for PP extrusion, tape production, weaving, printing and industrial bag manufacturing. QIPBF is operated by industrial veterans who are highly skilled and experienced professionals.

To ensure high quality of finished products, QIPBF has installed advanced quality assurance systems and procedures.

The products are constantly checked and tested for maximum quality at each manufacturing process stage.

The Company will be in a position to supply leading industrial companies in the petrochemical, cement, fertilizer and food sectors.

QIPBF's production line is equipped with high-end European machinery and technology with a processing capacity of 4,200 MT/year.

The facility can produce 48 Mn PP Sacks of various grades/year for wide industrial applications. QIPBF intends to export 80% of their production.

Company Profile

Al-Sada Pipes marked its entry into plastic industry to the Qatar market with the opening of its plant in the Industrial Area, Qatar, under the brand name AL-SADA PIPES. Al-Sada Pipes produces a range of PPR pipes and fittings. Our main aim is to offer product quality superior to what is currently available in the market. The pipe and fittings are produced to all major international standards:

- British Standard BS EN ISO 15874
- German Standards DIN 8077, DIN 8078, DIN 16928, DIN 16962

Our entire product range and production line is designed with European technology. All our products are made from virgin PPR and other premium materials that have passed a rigid end-to-end product and business process quality control.

We have the complete solutions for Hot and Cold Water Piping System from PPR. Standard Green color pipe and fittings are manufactured for Hot and Cold water system with PN 16 to PN 20 pressure capacity.

At present, Al-Sada Pipes continuously strives for continuous product and business process improvement and excellence as it aims to achieve the certification. This will assure stakeholders that its products and business processes conform to Quality Management System Standards.

We are committed to providing high quality products. We realize that the quality to our products has a powerful impact on our customers' operations and reputations. Therefore, we will strive to continuously improve our operations in order to deliver safe, effective, and timely products that meet the quality expectations of our customers.

Company Profile

Twyla Recycling is a subsidiary of Twyla, a Qatari organization dedicated to the betterment of all our communities. Taking inspiration from the environmental pillar of the Qatar National Vision 2030, and the country's forward looking environmental policies, Twyla Recycling was established in 2014 to provide a much-needed service to all of Qatar's communities – a means to reduce, recycle, and reuse waste to ensure a greener Qatar for generations to come. It is our hope that we can play a major role in Qatar's continued regional leadership in environmental and green-friendly policies.

We are currently recycling plastic waste coming from industries and consumers. In the next few years, the majority of our waste will come from consumers rather than industries – from households, communities, schools, and so forth – a first in Qatar.

Our state-of-the-art facility in the Industrial Area was also designed with expansion in mind, and it is our goal to also include other types of household waste to recycle in the near future, such as aluminum cans and electrical equipment.
